Terra Ceia
Total living area:
 2,824 square feet
 3 bedrooms
 3.5 baths
 2-car garage

Modern style and flow are front and center in our newest floor plan, The Terra Ceia. This home features 3 bedrooms, 3 and a half baths, and a study spread across 2,824 square feet. The impressive kitchen has a walk-in pantry and an island with bar top seating. It opens out into the dining room and great room, which both have access to the incredibly spacious rear covered porch. The master suite also has its own entrance onto the rear porch, along with separate walk-in closets, and a beautiful bathroom with an enormous walk-in shower, separate vanities and a soaking tub. The other two bedrooms bookend the kitchen, and each has its own private bath. The powder room, laundry room and valet are nestled in the back hall that leads from the garage. There are impressive 10-foot ceilings throughout the home, as well as your choice of tile or hardwood flooring in all the common areas. The 2-car garage has a handy pull-down ladder for access to the floored storage area in the oversized attic. This model is a member of our Generation Series which means the HVAC ducts are lowered from the attic into the conditioned space in soffits to increase performance and efficiency which equates to increased utility bill savings for you!

All GW Robinson Homes models are built to the highest standard of quality and efficiency, often times exceeding even the most recent construction codes and requirements. All base home prices include the Southern Traditions as the standard elevation. All included features correspond to the applicable community's feature sheet.
